November 15, 2022

To Whom it May Concern:

This letter confirms that Jadan Kerr worked as an Engineering Intern for QualityLogic from May 31, 2022, to August 8, 2022. He worked 392 hours over the past summer.

During his summer internship Jadan participated in Quality Assurance Engineering / Software Development Engineer in Test. While he was with QualityLogic he created test automation in Cypress utilizing the javascript language. This involved the extensive utilization of Object Oriented Programming. Jadan also learned other test automation frameworks to test APIs and React Native mobile applications.

Jadan is well grounded with OOP concepts and has a good level of visibility into full stack design. His work with QualityLogic allowed him to see how enterprise applications are created, and he learned how to thoroughly exercise them using both Greybox and Blackbox testing methodologies. Jadan was also exposed to Behavior Driven Development and has familiarity with Gherkin syntax.

If you have any questions regarding the above information, please don't hesitate to contact me.

Sincerely,

A handwritten signature in blue ink that reads 'Brianne Golat'.
